

Environmental Stewardship at Hong Kong Academy

At Hong Kong Academy we value how children learn as well as what they learn. By encouraging each student to take ownership for their learning and ask questions, we provide a joyful, authentic and meaningful learning environment in which students are motivated to contribute to their community and reach their full potential.

Innovation and Sustainability

In recognition of our mission as an innovative and future-focussed school, our campus was purpose built and is Gold BEAM rated by the Green Building Council of Hong Kong. Designed to operate as a sustainable learning lab, the campus employs durable materials and provides a healthy building environment. Data collection systems enable students to partner with our operations and facilities team to engage in environmental stewardship and data driven decision making to optimise the campus learning environment.

This year saw grade 6 students investigate renewable energy sources and opportunities for greenhouse gas reduction. Their analysis led to the submission of a grant application to the Solar Energy Support Scheme for Schools. The resulting installation of a 10KW solar energy generation system will provide renewable energy and contribute to the Hong Kong government climate action plan for carbon neutrality for years to come.

Exceptional Global Citizens

HKA students are exceptional global citizens who graduate with up to three Diploma credentials and consistently outperform world pass rates and average total IB Diploma points. This year's graduating class has been offered places at an impressive list of world-class universities including Ivy League colleges in the US and Russell Group universities in the UK. The school welcomes new families all year round, contact admissions to learn how your child could benefit from an HKA education.
